

INTRODUCING HOLCIM MORTAR

OUR HISTORY

Holcim Mortars combines over 30 years of specialist industry experience with the strength of a global leader in building materials.

Our expert sales, delivery, and installation teams ensure seamless setup, on-site training, and continuous support. With proactive silo monitoring and refill scheduling, we help you stay productive with reduced risk of running out.

Now part of Holcim UK, we bring together trusted names like Aggregate Industries, Lafarge and Eco-Readymix LTD united in 2025 to lead sustainable building innovation across the UK.

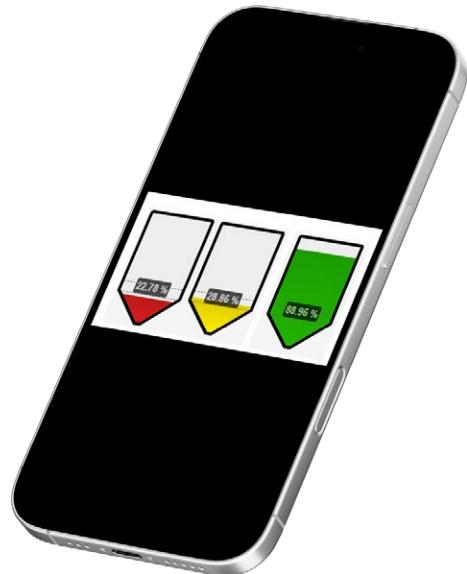

SMART DRY SILO MORTARS: PRECISION, PERFORMANCE, AND EASE

Holcim Mortar Smart Silos, our new technology designed to give you complete visibility and control over your mortar levels.

With our smart silos, you can access real-time updates 24/7 through the Vega App. This feature removes the guesswork, allowing you to monitor your mortar levels anytime, anywhere, and stay fully in control of your supply.

We remotely monitor your silos and will notify you when levels are low, pro-actively arranging timely refills that fit seamlessly into your schedule. This means fewer interruptions to your operations and reduced risk of running out of mortar.

Additionally, our silos feature three colour-coded level indicators that provide a simple visual status, so you always know at a glance if your silo is topped up, in use, or ready for replenishment.

OUR SERVICES: EXPERT SUPPORT FROM SILO SETUP TO SITE SUCCESS

SITE SURVEYS

Our experienced technical sales team will carry out a full pre-delivery site survey to ensure everything is in place for a smooth setup. From slab positioning to water and power connections, we make sure your site is ready from day one.

TRAINING

We provide your site team with hands-on training to ensure safe, effective use of the silo and mixer. From daily operation to cleaning and safety best practice, we cover everything—supported by online user guides and video content.

AVAILABILITY

We can supply new silos with as little as two week's notice, with refills available on a reliable next-day delivery schedule—keeping your project moving without delay.

SUPPORT

Our dedicated maintenance engineers are on hand to resolve any site issues quickly and efficiently. Each team carries a full range of parts to minimise downtime and keep your operations running.

MASONRY SYMMETRY

In addition to our Dry Silo Mortar, we also offer Ready-To-Use Mortar, allowing us to have a mortar solution available for each specific project.

DELIVERIES

We operate a specialist delivery fleet of 20-tonne rigid and 30-tonne articulated vehicles, helping you achieve easy access to a wide range of sites across the UK.
